### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1, 4-6, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eslaminovin in view of Mansell.

Regarding claims 1, 17, Eslaminovin discloses an anti-theft system for vehicles comprising vehicle-theft reporting means 12, an anti-theft service center 14 remotely from the vehicles, and an anti-theft apparatus 18 or control circuit 18 mounted on the vehicle for inhibiting an engine of the vehicle. Eslaminovin does not disclose the service center reporting theft of the stolen vehicle to authorities. Mansell teaches the use of an anti-theft service center 150 reporting theft of a stolen vehicle to authorities 160 (column 2, lines 35-68, col. 6, lines 55-68, col. 8, lines 35-40, col. 22, lines 35-47). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include the service center reporting theft of the stolen vehicle to authorities to the system of Eslaminovin as taught by Mansell for the purpose of providing a vehicle tracking and security system which allows immediate response in case of vehicle theft.

Art Unit: 2636

Regarding claim 4, Eslaminovin discloses an audio and visual warning 20, 22 to a driver of the vehicle to stop the vehicle.

Regarding claim 5, Eslaminovin as modified by Mansell discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose present-location detecting means. Mansell further discloses present-location detecting means 120 (abstract). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include present-location detecting means to the system of Eslaminovin as taught by Mansell for the purpose of providing a present location of the vehicle when needed.

Regarding claim 6, Eslaminovin discloses the vehicle-theft reporting means being a cellular phone 30 (col. 3, lines 40-60).

3. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eslaminovin in view of Mansell as applied to claim 1 above, and further in view of Gilmore.

Regarding claim 2, Eslaminovin as modified by Mansell discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the anti-theft apparatus inhibiting the engine of the vehicle from restarting in response to reception of the theft signal only when the vehicle is stopped. Gilmore teaches the use of an anti-theft apparatus inhibiting an engine of a vehicle from restarting in response to

Art Unit: 2636

reception of a theft signal only when the vehicle is stopped (column 3, lines 1-30, col. 5, lines 1-33). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include the anti-theft apparatus inhibiting the engine of the vehicle from restarting in response to reception of the theft signal only when the vehicle is stopped to the system of Eslaminovin (modified by Mansell) as taught by Gilmore for the purpose of providing a safe stop for the vehicle.

Regarding claim 3, Eslaminovin as modified by Mansell discloses all the claimed subject matter as set forth above in the rejection of claim 1, and further discloses the anti-theft apparatus blinking lights 20 of the vehicle, but does not disclose continually sounding a horn of the vehicle in response to reception of the theft signal when the vehicle is in motion. Gilmore teaches the use of an anti-theft apparatus continually sounding a horn of the vehicle in response to reception of the theft signal when the vehicle is in motion (column 3, lines 1-30, col. 5, lines 1-33). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include the anti-theft apparatus continually sounding a horn of the vehicle in response to reception of the theft signal when the vehicle is in motion to the system of Eslaminovin as modified by Mansell as taught by Gilmore for the purpose of attracting attention of any local population.

***Answers to Remarks***

4. Applicant's arguments filed on January 29, 2003 have been fully considered.

Applicant's arguments with respect to claims 1-6 and 17 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

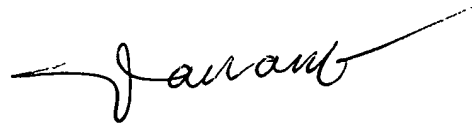

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
